Secretary

METROPCS FACT SHEET

MetroPCS Communications, Inc. is the United States' fifth largest facilities-based wireless carrier and provides unlimited wireless communications services for a flat rate with no annual contract. Headquartered in Richardson, Texas, MetroPCS' services cover more than 11,000 cities and towns in the United States, and the company has access to licenses covering a population of approximately 146 million people in many of the largest U.S. metropolitan areas. As of June 30, 2010, MetroPCS had more than 7.6 million subscribers.

History

MetroPCS was established in 1996 as General Wireless, Inc., by Roger D. Linnquist and Malcolm Lorang, both of whom were previously executives with revolutionary wireless provider PageMart Wireless. The company changed its name to MetroPCS Communications, Inc. in 1998 to better reflect the company's goal of providing affordable, unlimited wireless services in major metropolitan areas across the country for consumers traditionally underserved by existing wireless carriers.

Services and Devices

In January 2010, MetroPCS launched its Wireless for AllSM family of unlimited talk, text and Web service plans in which taxes and regulatory fees are included in the flat rate cost. The four plans range from \$40 to \$60 per month and provide consumers with simple and predictable wireless services. The company has articulated its plans to be one of the first carriers in North America to deploy 4G services and phones for consumers via a next-generation LTE network, which is expected to launch in the second half of 2010.

MetroPCS has a full spectrum of phones for every budget and lifestyle, including smartphones, messaging devices and feature handsets. The company's extensive portfolio of handsets includes phones from leading manufacturers like Huawei, Kyocera, LG, Motorola, Nokia, Research In Motion, Samsung and ZTE.

MetroPCS delivers its products and services through a network of corporate-owned stores and authorized reseller locations across the United States. MetroPCS products and services are also available at national retailers and chains including Best Buy and Walmart and Michigan-based Meijer.
